- What is a species?
- Individuals of the same species can reproduce
- Differences are called variations
- Variations are inherited
- Variations among family members
- Topic 4 Revision
- Term 1 Practice test

## Physical properties of materials

- Properties of materials determine their suitability for a particular use
- Skills focus – Draw line graphs

## Impact on the environment

- The production and use of materials has an impact on the environment
- Topic 5 Revision

## Mixtures

- Pure substances
- Mixtures

## Methods of physical separation

- Hand-sorting
- Sieving
- Filtration
- Using a magnet to separate mixtures
- Evaporation
- Distillation
- Chromatography
- Practical task

## Sorting and recycling materials

- Every person is responsible for waste disposal
- Materials suitable for recycling
- Materials that cannot be recycled
- Systems to sort and dispose of waste
- Negative consequences of poor waste management
- Topic 6 Revision

## Tastes of substances

## Properties of acids, bases and neutrals

## Acid-base indicators

## Topic 7 Revision

## Arrangement of elements in the Periodic Table

- Arrangement of the elements
- The three main categories of elements

## Properties of metals, semimetals and non-metals

- Metals and non-metals
- Semimetals
- Topic 8 Revision
- Term 2 Practice test

All the keywords, worksheets and activities done in the NS workbook.
